

Billa Říčany, Prague

Mall cooling and heating

Installation year: 2007

Cooling power: 55 kW

Description: Chameleon heat pump connected to our dispatching looks after technology of the whole Billa shop in Černokostelecká street in Říčany-Strašín (Prague) nonstop.

Very modern solution, consisting in cooling and heating the selling areas. During summer months, the selling areas are cooled and residual heat is used for heating up hot service water. During winter months, the heat pump works in heating mode into air-conditioning system.
